

DEPARTMENT OF ANAESTHESIA AND PERIOPERATIVE MEDICINE

HUMAN FACTORS SHORT COURSE 2020

Why do the course?

This course will provide an introduction to the practical application of human factors principles to organisational and clinical settings. By doing so, it will encourage the participants to improve patient safety at a managerial or clinical level with a broader base of skills than is commonly available within health services.

Who is the course aimed at?

- Hospital Doctors, General Practitioners
- Public Health clinicians, Allied health practitioners
- Health service managers, Quality and Safety managers

Time commitment

6 hours per week

Topics include

- Human factors engineering and varieties of human work *Dr Steve Shorrock*
- System resilience in healthcare *Dr Sudeep Hegde*
- Studying interruptions in healthcare *Dr Chiara Santomauro*
- User centred design and designing for team work *Dr Mia McLanders*
- Hierarchical task analysis *Mr Stuart Dickinson*
- AcciMap and other system techniques *A/Prof Sharon Newnam, Dr Natassia Goode*
